

**STANDARD PRICING SCHEDULE: EIC**  
**ECONOMIC INCENTIVE CREDIT RIDER**

**STATE OF OKLAHOMA**

**EFFECTIVE IN:** All territory served.

**APPLICABILITY:** The purpose of this rider is to provide a credit to Large Power and Light (LPL) customers if they choose to subscribe part of their annual kWh consumption to the Economic Incentive Credit program. The yearly surcharge applies to all Oklahoma retail jurisdiction customers as described below.

**SUBSCRIPTION LEVELS:** Economic Incentive Credit program will be capped at 195 million kWh and be reserved for use by the LPL class for each of the calendar years 2007, 2008, 2009, 2010, and 2011 unless terminated earlier through a general rate proceeding. These 195 million kWh represent approximately 3.75% of the total yearly consumption of the LPL class. Each customer in the LPL class shall be given the opportunity for the years of 2007, 2008, 2009, 2010, and 2011 unless terminated earlier through a general rate proceeding to subscribe to a portion of their total energy consumption from the Economic Incentive Credit program. Each customer shall have the opportunity to subscribe up to 3.75% of their most recent 12 months of kWh consumption as calculated in November of 2006, 2007, 2008, 2009, and 2010. If any LPL customer chooses not to subscribe to Economic Incentive Credit program, its unsubscribed kWh shall be returned to the LPL class and be subscribed as defined under the Allocation Formula and Percentage section of this rider.

**SUBSCRIPTION BENEFITS AND FUNDING FOR THE LPL ECONOMIC INCENTIVE CREDIT (EIC):**

Subscription Benefits apply to the years 2007 through 2011. The Subscription Benefits and the EIC funding are composed of a three-step process:

**Step One:** Reflects the yearly credit that will be available for LPL customers that subscribe to the Economic Incentive Credit program. The EIC will be calculated by multiplying \$0.01000 per kWh times the total subscribed kWh for the LPL class. The total yearly Economic Incentive Credit program kWh for the LPL class shall not exceed 195 million kWh. The expected yearly maximum class credit amounts are specified as follows:

<u>Year</u>	<u>kWh Credit</u>	<u>Total Annual kWh</u>	<u>Credit Amount</u>
2009	\$.01000	195 million	\$1,950,000
2010	\$.01000	195 million	\$1,950,000
2011	\$.01000	195 million	\$1,950,000

**Step Two:** The development of the yearly surcharge is calculated by using the yearly Credit Amount divided by the applicable Oklahoma retail annual kWh (excluding LPL class kWh,

and other excludable Special Contract kWh) from the most current 12 months. This factor shall be calculated each December and shall be applied to the next billing year's applicable Oklahoma retail kWh as a surcharge.

Step Three: The EIC true-up is the over or under amount and is the difference between the actual Credit Amount credited to participating Economic Incentive Credit program LPL customers and the actual surcharge amount billed to all applicable non-LPL retail customers within a specified yearly period. All true-up amounts for any previous period will be added to or subtracted from, whichever is appropriate, the next-year's calculated surcharge amount for the next calendar year implementation.

**ALLOCATION FORMULA AND PERCENTAGE:** Each LPL customer shall have the option to obtain additional EIC energy through an annual thirty (30) day enrollment period commencing on October 31 and ending November 30 in accordance with the following Parameters:

- o Annual EIC kWh Available = 195 million kWh unless otherwise limited
- o LPL Customer EIC Allowable Percentage = up to 3.75% of a customer's total annual usage based upon the customer's most current 12 months kWh history or demonstrated history.

If at the end of the annual thirty (30) day enrollment period (November 30) the 195 million EIC kWh are not fully subscribed, participating LPL customers who indicated their interest in unsubscribed kWh will be given the opportunity to subscribe to those unsubscribed kWh using the following formula and conditions:

$$\text{Customer Additional EIC kWh \%} = \frac{\text{Available Unsubscribed EIC kWh}}{\text{Total Annual kWh of Additional Requesting Customers}}$$

- o Customers, at their option, may request less than the Customer Additional EIC kWh % the formula allocates
- o Customers may not receive more than 100% of their total annual kWh usage

**SUBSCRIPTION TERM & LEVEL:** Once the final allocation has been determined, each customer's allocation shall remain fixed for one calendar year until the next year's subscription period. Continued LPL participation in the Economic Incentive Credit program requires re-subscription each year. Levels of subscription are subject to availability of EIC energy for the
