

OG&E SCHOOLS & GOVERNMENT EFFICIENCY PROGRAM

FACT SHEET

Design

OG&E provides incentive funding for energy-efficient upgrades and retrofits to all educational and publicly funded facilities within our service territory. Based on the energy-efficient measures you choose, we'll help you secure the largest incentives available. Free educational activities are also available, which are designed to help administrative personnel at facilities to identify and quantify energy efficiency opportunities.

Goals

The program aims to help cover a portion of the total cost of each project. Over the long term, we're here to help participants save money on utility bills, improve comfort and protect the environment through education, increased efficiency and responsible energy consumption.

Implementation

Program representatives will help facilities with participation in all our available services, and help determine what energy efficiency measures will work best for them.

Eligibility

All educational and publicly funded facilities are eligible to participate if they're located within the OG&E service territory.

Timeframe

Participation is based on a first-come, first-served basis throughout the program year, or while funds last.
