Degree days (A)						
Heating - Actual	<b>234</b>	210	<b>1,926</b>	2,220		
Heating - Normal	<b>249</b>	249	<b>2,136</b>	2,136		
Cooling - Actual	<b>571</b>	736	<b>577</b>	739		
Cooling - Normal	<b>553</b>	553	<b>563</b>	563		

(A) Degree days are calculated as follows: The high and low degrees of a particular day are added together and then averaged. If the calculated average is above 65 degrees, then the difference between the calculated average and 65 is expressed as cooling degree days, with each degree of difference equaling one cooling degree day. If the calculated average is below 65 degrees, then the difference between the calculated average and 65 is expressed as heating degree days, with each degree of difference equaling one heating degree day. The daily calculations are then totaled for the particular reporting period.
