OG&E COMMERCIAL ENERGY EFFICIENCY PROGRAM

ENERGY SAVINGS ARE IN THE AIR.

Capable of powering everything from HVAC controls to air-powered hand tools, compressed air can be a vital energy source for your facility. Although often considered a free resource, compressed air systems account for nearly 10 percent of total industrial electricity use.

To OG&E, that represents a great opportunity to save. Our team of energy experts offers a variety of custom solutions designed to save energy, time and money by optimizing your facility's compressed air system.

Demand-side energy efficiency measures include:

- Leak repair or leak-free aluminum piping
- Open blow modifications (high-efficiency nozzles)
- · Re-piping
- Loop reconfiguration
- · Air equipment repairs
- · No-loss or reduced-loss drains

Supply-side energy efficiency measures include:

- New air compressors and air dryers
- Installation of increased storage capacity
- · Replacement of existing compressors
- · Compressor controls
